

Special Notes

for MEXT Scholarship applicants who wish to enter GSP

Graduate Program on Global Society (GSP) application and MEXT Scholarship application are two different things. The screenings are conducted separately. If you wish to enter our GSP program as a MEXT Scholar, you must apply for both the GSP program and the MEXT Scholarship and pass both screenings.

Successful MEXT Scholarship applicants will be accepted as a Postgraduate Foreign Research Student, which is a non-regular student course and this does not guarantee your admission to the GSP program.

The GSP program does not accept non-regular student. They only offer Master's course and Doctoral course.

Therefore, please note the following points when you apply for acceptance as a MEXT Scholar.

1. Please inform the International Student Section that you will apply/have applied for the GSP program.
2. In case you have not yet been admitted to the GSP program and wish to spend the period of non-regular student as a MEXT Scholar at our graduate school, you should go through the procedures to apply for acceptance as a non-regular student for the time being. As stated on our website, please choose a faculty member that you wish to be your academic advisor and apply for acceptance not at the GSP program but at the department that the faculty member belongs to.
3. Upon your application for acceptance as a MEXT Scholar, contacting faculty member beforehand is not forbidden. However, whether or not correspondence is accepted beforehand depends on the faculty member and department.

As for the GSP program, supervisors are to be appointed by the Committee of the program for all GSP students. For details, please refer to the following website:
